Where practical and refined come together in a family friendly environment

**It's not the hat that makes you a cattleman.  
It's what's under it.**

The smart cattlemen are the ones who give themselves every edge before they get to the sale barn. That's why they use Dectomax®

- Research<sup>1</sup> shows that over a 40-day period following application, total drug availability<sup>2</sup> for Dectomax Pour-On is 45% greater than for Ivomec® Pour-On.
- Dectomax Pour-On lasts twice as long against the economically destructive brown stomach worm as Ivomec Pour-on.
- By reducing the stress caused by worms, Dectomax helps improve your animals' appetite, their response to vaccines, and their ability to grow faster and stay healthier.
